POSWatch and Milestone Systems

POSWatch integrates with Milestone Video Management Systems (VMS) for advanced video management capabilities.

How does it work?

To deploy POSWatch with Milestone VMS, use the POSWatch Server platform, which ships pre-configured with all software required to work seamlessly with Milestone VMS.

Advantages of Milestone VMS

Using POSWatch with Milestone VMS offers the following key advantages:
- All 50+ POS integrations supported by POSWatch are now available to Milestone VMS users
- Milestone VMS includes complete ONVIF support, so customers can continue to use existing IP cameras.
- Milestone VMS offers unlimited scalability
- Milestone VMS includes a Web Client interface compatible with most browsers
- Milestone VMS includes a phone app compatible with most smart phones
- Text overlay is optionally available for customers who want to see transaction data on their cameras (for compatible cameras only)
- POSWatch Client integrates with the Milestone Player Client to allow remote playback of any camera in the Milestone system, including text overlay
