

# Remote Eyes® SiteAudit™

Customizable property management performance monitoring service

Reduce the cost of onsite management with confidence that your properties are meeting your performance standards

The RemoteEyes SiteAudit performance monitoring service uses your existing security camera system to report the details of resident, visitor, and contractor activities that can damage both capital equipment and community reputation. Highly efficient, SiteAudit performance monitoring is able to measure key indicators every day at a cost that is significantly less than a dedicated 24x7 onsite manager. SiteAudit can be ordered as needed or set up as a daily or weekly recurring service.

## Who Can Use This:

- > Multi-tenant residential communities
- > Planned unit development (PUD) communities
- > Public recreation facilities
- > Elder care and assisted living facilities
- > Hospitals and clinics
- > Corrections facilities

## Product Features

- > Costs less than 24x7 dedicated onsite management
- > Precisely measure employee/contractor performance at every point in your operation
- > Monitor effectiveness of security guard patrols
- > Confirm that critical procedures are performed as instructed
- > Focus training on areas where management standards are not being met
- > Link employee bonuses and benefits to specific performance objectives
- > Lower worker's compensation and liability insurance costs by improving workplace safety practices
- > Monitor key tenant satisfaction procedures

## Performance Reports Emailed to Management – Every Day

The metrics created by the SiteAudit service are emailed daily to management in the form of charts and graphs. The layout is designed to paint a clear picture so that management can spot problem areas and take immediate corrective action. Fully customizable, clients choose what they want to see and how they want to see it. Daily tracking reveals positive and negative trends for a particular location or across all locations. For an even closer look, all supporting data is also available in spreadsheet format for further analysis.

Performance monitoring reports are easily viewed on a tablet, smartphone or PC and quickly reveal each day's results and trend.
