

POS Integration with Existing CCTV Systems

Many customers want POS Integration, but are stuck with a CCTV system that does not provide it. For these situations, Remote Eyes Enterprise Data Server (EDS) is capable of integrating with third-party CCTV systems for transaction-based video search and retrieval (assuming the third-party CCTV system offers an SDK/API for remote video search). In this case, EDS will continue to provide real-time network POS data acquisition, enterprise transaction database archiving, exception analysis and reporting, email alerts, and transaction-based video search and retrieval.

EDS will not provide true text overlay when used with existing CCTV systems. Customers requiring true text overlay should upgrade to Remote Eyes video management.

EDS pricing options include software license fees based on the number of stores and registers covered and professional services fees for customizing POS filters, transaction search screens, exception reports, email alerts, and 3rd-party CCTV adapters. Contact your Remote Eyes Sales Executive for a price quote.

The Remote Eyes team has over 10 years of experience integrating CCTV with over 50 leading POS software packages. We are the industry experts and partner of choice for your POS Integration project, regardless of the camera system you are currently using.

For more information about POS Integration, email us at sales@remoteeyes.com or call us on (888) 291-6379.

About Odyssey Technologies, Inc.

Since 1997, Odyssey Technologies, Inc. has been an early pioneer and leader in digital video.
